
The NOD Song

Anytime you boot up your computer
Your door is open to some cowboy virus shooter
There ain't no need to worry if you got it
'Coz Mr. IMON's gonna shout.... "Let's NOD it!"

NOD--we protect your digital world
NOD32-- we protect you

You open a file and AMON says "Wait!"
Ain't no need to get stressed or in a state
'Coz you know those worms ain't got no manners
NOD will smack 'em with its on-demand scanner

Rpt. Chorus

Worms?... and Trojans
Make your life so scary
But ain't it great?... You got a mate
He's called NOD and he'll never hesitate

When the Internet's crawling with nasty critters
And you're wonderin' if your PC could be fitter
You should know, it's a pretty safe bet
No-one's gonna help ya better than ESET
