## Infected

My baby's gone and got me infected  
Now I dunno why she's getting so close  
She's been messin'-round with some other hard drive  
And my PC's gone and caught a dose

Why oh why, didn't I Keep subscribing to NOD32?  
My machine's just a box, with a dose of the pox  
And there's nothing I can do

I'm gonna go online and look for ESET, I know what I gotta do  
Renew my license and get up to date, I'll never leave NOD32

I blame myself for not taking precautions  
Coz my girl, she just don't care
