Malware Blues

Got myself a PC…..Didn't know what lay in store
Hooked it up to the internet…This was great, I felt sure.
But I got malware flying at me….Didn't know just what to do
Then my dog looked up at me and barked…"You need NOD32"

I got the Malware Blues…baby help, I'm begging you girl
I need NOD32…… 'coz he'll protect my digital world

So I purchased me a license…downloaded after ESET's email came
& I did like they told me….copy & pasted my username
Now IMON scans my email….& AMON's checking all my files
Got me an On-demand scanner…got me the best AV for miles.
But I got the Malware Blues…baby help, I'm begging you girl
I need NOD32…… 'coz he'll protect my digital world
The internet ain't always safe…full of viruses it's true
But I ain't so concerned now…. 'coz I got NOD32

I ain't got no Malware Blues……'coz I bought me a little pearl
Yeah, I got NOD32…… he's protecting my digital world
I ain't got no Malware Blues……Take my advice on what to do
I ain't got no Malware Blues …… buy yourself NOD32
